

XOX Audio Tools announced that in occasion of the Musikmesse tradeshow in Frankfurt, it will put on display for the first time in Europe the newest versions of the Handle, a revolutionary carbon fiber guitar.

This year's improvements include a choice of inlays, the Handle's sleek black carbon fiber fretboards come standard with the single-dot inlay, a sharp 12th fret marker in mother of pearl; or as an optional add-on the zig-zag inlay, an electrifying white resin inlay. And on top of that, the Handle now comes with a truss rod to give the musician the chance to adjust the set up for his individual playing style.

XOX Set to Display The Handle Guitar at Musikmesse Next Week
