

Released at this past Winter NAMM show in Anaheim and shown in Frankfurt at Musikmesse, Godin Guitars has begun shipping the new Summit CT featuring High Definition Revoicer.

The Summit CT features a highly figured solid maple carved top (CT) and a resonant solid mahogany string through body. The worn in feel of the Ergocut shaping technique used on its ebony fingerboard facilitates the ease of play of its comfortable mahogany neck. This 24 3/4" scale is powered by two Seymour Duncan humbuckers. An Alnico 2 in the neck position and a '59 in the bridge controlled via a 5-way switch, provide tones for many styles of players, most notably the classic, hard-rockin' variety.

The Summit CT is also another one of the Godin models to feature the innovative High-Definition Revoicer system. The H.D.R. revoices and augments the frequency range of each pickup, redefining their character while allowing the player to go from passive to active pickups with the simple push of a button. The H.D.R. gives guitarists the best of both worlds and provides extra bite and dynamic response.

Some of the finishing touches found on the Summit CT include cream binding, a pearloid inlay at the twelfth fret and three finishes which include a Natural Flame, Trans Black Flame and Sunburst Flame.

SPECS:

Neck: Mahogany

Fingerboard: Ebony

Radius: 16" (40,6 cm)

Scale: 24 3/4" (62,9 cm)

Nut width: 1 11/16" nut width (4,3 cm)
