

## **Video Review: Trainwreck Rocket Amplifier**

Wednesday, 15 July 2009 02:11

---

Today we are featuring a video of a Trainwreck Rocket amplifier. The Rocket is one the rarest and most valuable guitar amplifiers ever made. It features a quad of EL84 power tubes. It is the ultimate in clean chime and responsiveness. The Rocket was plugged into a Bruno 2x12 cab loaded with Celestion Gold speakers. Sit back and enjoy this new GJD feature with our own Ken Volpe jammin' with the Trainwreck Rocket.
