

In Part 1 of our *Behind The Scenes* Interview with Scott Smith of ProAnalog.com , Ken Volpe and Scotty talk about early Fuzz Pedals like the Sola-Sound Tonebender and what amps they work with and what amps they don't work with. They also get into a detailed discussion of what kind of player should and should not use a Fuzz pedal. In addition, Scotty describes how internal components flavor the sound and feel of a pedal.

Enjoy this gearhead special with Scott Smith!
